ARCHITECTURAL
BACKLIGHT

LinkH₉₆₀ is a LED strip with 960 diodes on a 5-meter roll. Very high luminous flux (1235lm) obtained from 1 meter, as well as very high efficiency (130lm/W) are the basic distinguishing features of LinkH₉₆₀ tapes. Thanks to the very high number of LEDs it provides strong and uniformly illumination. It is perfect for professional lighting of furniture, light boxes, POS systems and interior design elements. Double-sided 3M VHB™ industrial adhesive tape on the back is used for assembly. Tape LinkH₉₆₀ tape is powered by 24VDC and has a 3-year warranty. Its additional advantage is the high color rendering index at the CRI 90 level, which makes the LinkH₉₆₀ tape ideal for applications where we care about extracting the most vivid and highly saturated colors from illuminated and exposed products.

DIMENSION [mm]

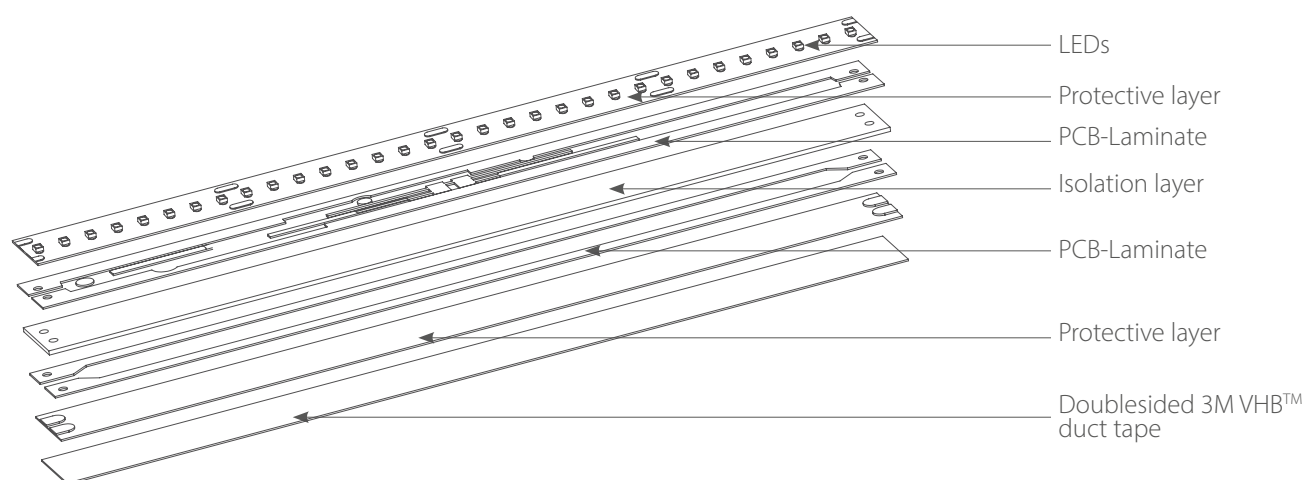

LEDlink

www.ledlink.pl

* dimension of the cutting
section

Type	LinkH ₉₆₀
	W3035K
Symbol	T350514
Color	white
Voltage [V DC]	24
Current [mA/1m]	380 ~ 420
Power consumption [W]	9,5 (±5%)
Luminous flux [lm]	1235 (±5%)
Light output [lm/W]	130
Beam angle [°]	120
Protection degree	IP20
Color temperature [K]	3000 + 3500
Wavelength [μm]	-
Operating temperature [°C]	-10 - +40
LEDs	SMD2835
LED quantity [pcs./m]	192
Partial [cm]	4,16
Lifetime [h]	30.000
Warranty [months]	36
Packing [m]	5

CONSTRUCTION

Supply method: The maximum length of the section fed in series is 5m.

This product must be installed in an aluminum profile or other material with good heat dissipation.

On request, possible sections: 30m or 50m
