APPLICATIONS

Typical applications: store furniture | POS applications | alternative light source

LinkM₆₀₀ is a professional stripe with 600 diodes per 5m roll. It is ideally suited for illuminating light boxes, POS systems, furniture and interior elements. Thanks to the high number of diodes, the various projects can be illuminated very strongly and uniformly. Double-sided 3M VHB™ industrial adhesive tape on the back is used for assembly. The LinkM₆₀₀ stripes are powered by a 24VDC power supply and have a 3 year warranty.
